

Access Denied

presented by David DeVasto

My installation, "Access Denied," is a program where non-musicians can interact with the computer. It was created using Max/MSP as a response to the questions and accusations of political hacking in the 2016 Presidential Election of the United States.

David DeVasto's music has been performed and broadcast from coast to coast in North America and internationally in Europe, Asia, and Africa. He has received commissions from Duo Tandem, Avanti Trio, and Picoso, and he received first prize for the 2015 International Composition Competition of The Classical Guitar Society of Victoria. His works are published by The SCI Journal of Music Scores and Bergmann Edition, and recordings of his compositions appear on Navona Records. Additionally, DeVasto is featured as a pianist on several albums, including Dreams of Pangea (Southport Records), and Reflection (Flitterswift), featuring renowned Jazz saxophonist Mark Colby.
